Bologna? A destination to discover. Giosuè Carducci, who deeply loved this city, said Italian people didn't know as it really deserved. Famous city of art, it keeps vertigo treasures in the half-light of churches, oratories, buildings, that direct our gazes towards horizontal depths. Maybe for this lack of heights, the famous towers were erected. A crenellated stone trunks forest that in the 13<sup>th</sup> century made Bologna a sort of ahead of our times Manhattan. The arcades were perfect for meetings, meditations, contemplations. It is not by chance that the most absolute pictorial silences were born here, those of Giorgio Morandi, for example, with his bottles still life, similar to architectures, ideal and abstract transposition of the city, with its noble tower outline. Here there are 10 places to visit: to the reader the pleasure di discover much more.
